Grant funds work of KU, Olathe schools

Faculty design workshops for history teachers

The Olathe School District and KU faculty announced their fourth collaborative project in which district teachers and KU faculty are working together to provide staff development for teachers and enhanced programs for district students.

The most recent project is a three-year $661,650 U.S. Department of Education grant funds seminars and workshops designed by KU faculty for 20 history teachers in the seventh through 12th grades. William "Bill" Tontsuk, KU associate professor of history, worked with Maureen Donegan, Olathe district social studies coordinator, to write the grant titled "Connecting Learning and Instruction in Olathe (CLIO): In Search of the Common Good."

“Our history faculty is working with our history teacher colleagues in Olathe to better equip them with the skills to teach the histories of Kansas, the United States and the U.S. in a global context,” Tontsuk said.

Donegan noted, “Working with KU has provided our teachers with the content knowledge and resources they needed to enhance and expand course offerings for Olathe students. We are looking forward to extending the partnership that we formed through our International Studies program through the Teaching American History grant." CLIO teachers will examine the concept of the "common good" in America and how the concept has changed through time and historical circumstances as well as how it applies to the nation’s international role. Internationally recognized scholars from KU in American history will cover chronological periods from the 18th century to the present.

KU history faculty serving on the CLIO advisory committee include Karl Brooks, assistant professor; Jonathan Earle, associate professor; Paul Kelton, assistant professor; and KU faculty are working togeth-

Chancellor’s residence featured on holiday tour

This Christmas season, visitors were able to get a look at The Outlook, also known as the chancellor’s residence, and help provide health care for the uninsured of Douglas County at the same time.

The house was part of the Holiday Homes Tour benefiting Health Care Access Clinic, an organization that provides health care for individuals without health insurance. The tour was Sunday, Dec. 4.

The tour featured nine homes in Lawrence. Tickets came in the form of a 2006 desk calendar, with the pages featuring pictures of the homes on the tour.

The first floor of the house, which features the living room, dining room, entryway, and kitchen, was decorated in a theme of "A Colonial Christmas." The second floor contains the bedrooms and bathrooms, and is decorated for a "Victorian Christmas." The third floor is a "Deco Christmas." The outside of the house is decorated for a "Christmas Around the World" theme.

In 2007, the tour will be held on Saturday, Dec. 2.

Regents support cancer initiative

U got a strong vote of support in its quest to achieve No. 1 priority from the Board of Regents last month. The regents voted unanimously to support the effort of achieving Comprehensive Cancer Center status from the National Cancer Institute.

The vote came after Roy Jensen, director of the KU Cancer Center, made a presenta-

tion to the regents about efforts to achieve the designation and the benefits it would bring to the university, state and cancer patients. Although the regents and the state of Kansas would not be responsible for funding an NCI-designated Comprehensive Cancer Center, Jensen said he wanted to make sure they were apprized of the efforts taking place. The presentation was the first to the entire board of regents.

Jensen, who was recruited from the NCI-designated Vanderbilt University-Ingram Cancer Center to be the first full-time director, said Kansas is a logical location for the center.

“Over the last 10 years in the United States as a whole, cancer mortality has been dropping about 1.1 percent. In Kansas, it has only been falling at about half that rate,” he said.

Achieving the designation will not come quickly. Many centers spend nearly a decade pursuing NCI status. KU’s goal is to have the designation in place by 2010. To do so, Jensen said the first step is hiring a deputy director of clinical affairs who would organize the political process. The process

Professor designs world’s 10th tallest residential complex

Peter Pran, professor of architecture, shown, designed the Sail @ Marina Bay, a residential complex in Singapore. An artist’s rendering, right, shows the pair of buildings that resemble sails of a ship that has docked in the bay permanently.

The vision of a KU professor is going to change the skyline of Singapore.

Peter Pran, professor of architecture, is the lead design principal for NRUI, the architecture firm for “The Sail @ Marina Bay” tower project, which will be the 10th tallest apartment building complex in the world.

The buildings will have the appearance of sails in the Marina Bay. One tower will stand 70 stories tall, and the second will be 62. A view from the bay will show the futuristic buildings, slightly angled toward one another, standing alongside the tallest buildings in the Republic of Singapore, a city-state.

“Most of the buildings (in Singapore) are rectangular, and some are triangular,” Pran said. “This the first project that has a curved sculptural appearance; the towers look like sails of boats that have anchored there permanently.”

The client that is developing the buildings invited Pran and NRUI to submit designs. They weren’t competing with other firms but were working against the clock. They only had about six weeks to submit design proposals to the chairman of the company, CDL, and to their joint developer, AIG.

“We had to compete with ourselves. We showed CDL/AIG three schemes, and the chairman immediately picked this one,” Pran said of The Sail @ Marina Bay.

The original designs were made about two years ago. Construction work on the buildings started early this year. The foundation is being put in place now, but the building will begin to rise above ground level in January. Pran said the towers are scheduled to be completed by early fall 2008.

That hasn’t stopped people from staking their claim to The Sail. All of the apartments in the first tower sold out in about three months. When apartments in the second went on sale about six months later, they were snatched up just as quickly, with one-bedroom units selling for about $212,000. People who are not residents of Singapore purchased many of the units. And numerous individuals bought multiple units.

Research supporting academic freedom passed

In the wake of a controversy over a professor's comments about "Intelligent Design," the University of Kansas Faculty Council unanimously passed a resolution stating that the University of Kansas supports academic freedom but acknowledges the responsibilities that come with it.

The resolution was passed Dec. 4 after religious studies professor Paul Mercier withdrew his planned spring semester elective course, "Special Topics in Religion: Creationism and Intelligent Design." The full text of the resolution is below.

The University of Kansas Faculty Council has determined that the university supports academic freedom, including the right to offer courses that examine controversial subjects, is essential to the mission of the University: to educate and prepare our students for scholarly inquiry.

Open inquiry for all citizens is essential to the academic freedom enjoyed by the faculty also imposes special obligations. As stated in our Faculty Handbook, we recognize among those obligations that:

The public may judge us as scholars and educational leaders, our profession, and our institution by our public utterances, and

We have a responsibility to avoid imprecision, to express ourselves accurately, and to stand ready to answer the questions of others.
Investment class fund
nears $1 million mark

Students invest donor’s cash in stock market

$230,000 can be considered a humble beginning, the Applied Portfolio Management class at the University of Kansas has come a long way.

The class began after KU alumna Rent McCarty made the $200,000 plus donation in 1993 to provide students an opportunity to make real investments in the stock market. Now, despite the volatile nature of the market, the fund is flirting with the $1 million mark.

“It was a big deal for me,” said Catherine Shenoy, assistant professor and director of Applied Portfolio Management, who leads the class, of topping the million-dollar mark. “I wanted to call someone and say, ‘Guess what we did!’ I know some of the alumni were excited, too, because they sent e-mails congratulating us.”

The fund surpassed the magical million-dollar mark in August but has since dipped back below. A few under-performing stocks are partly to blame, but the decrease is also due to a contribution from the fund to the KU community. Each year, the fund makes a donation to a basketball scholarship.

“It was a big deal for me,” said Catherine Shenoy, assistant professor and director of Applied Portfolio Management, who leads the class, of topping the million-dollar mark. “I wanted to call someone and say, ‘Guess what we did!’ I know some of the alumni were excited, too, because they sent e-mails congratulating us.”

The fund surpassed the magical million-dollar mark in August but has since dipped back below. A few under-performing stocks are partly to blame, but the decrease is also due to a contribution from the fund to the KU community. Each year, the fund makes a donation to a basketball scholarship. This year’s award was worth about $16,000, Shenoy said.

The class allows students to trade stocks using real money, giving them practical investment experience. The students are expected to make stock recommendations only after digging into the fundamentals of companies. This preparation teaches them how to make buying and selling decisions based on research.

The portfolio’s gain is actually more impressive than it appears. Near the end of 2002, it was down to near $200,000. In less than three years the portfolio jumped by about $800,000 – representing an increase of nearly 400 percent during that period.

The surge has continued this year, the portfolio has gained 8.5 percent since January. McCarty, who gave the grant and founded the class, is no longer the lead instructor, but Shenoy said he stays in contact. The former Goldman Sachs associate, who managed about $1 billion in investment funds, has also helped the class learn about international investing, through his business contacts in China. Shenoy said about 15 percent of the fund is invested in Chinese equities, while about 25 percent of the fund is invested internationally.

The class has also been credited with bringing KU students to the attention of Wall Street recruiters. High rollers in the nation’s financial capital now know KU students have been armed with real-life experience before graduation.

Web works

The Beach Center on Disability’s Web site features human interest stories, research summaries, links to organizations and tips for parents and educators. Also posted is a quarterly newsletter exploring a topic in-depth (currently the Human Genome Project). The site hosts blogs and discussions on hot issues, such as how to evacuate people with disabilities during a disaster. The site is accessible to individuals with visual impairments and includes materials in six different languages.

Tech tips

The GIS and Data Services Lab provides one-on-one consulting and help with social sciences data and statistical computing software, including SPSS, SAS and ArcView GIS. Learn more at www.lib.ku.edu/gis.

In the news

GOOD REVIEW: Entertainment Weekly gave KU professor Kevin Willmott’s movie, “CSA: Confederate States of America,” an A+, calling it a “brilliant and factual racial-historical satire, done in a meticulous recreation of the Ken Burns mode, that chronicles the last 150 years of America as if the South had won the Civil War.” The “mockumentary,” is now being released in selected cities by IFC Films.

KU Web site to greet users with new look

‘New look and feel’ to take effect Jan. 17

When people open the KU Web site Tuesday morning, Jan. 17, an entirely new site will greet them. The KU Web Strategy team will launch the redesigned site as part of the university’s new visual identity. Lisa White, Web communications manager, and Julie Loats, director of enterprise Web services, said the redesigned site will provide a new look and feel, as well as more consistent navigation.

“It will be easier to use and better to look at,” Loats said. It may take a little time to get familiar with the new structure of the pages, but all of the information currently on the site will still be there. Much of the information will, in fact, be updated. Features such as KU X2 and the search tool will still be available and displayed prominently.

The site will use KU’s primary colors as well as the new tradition football signature. “It’s more recognizable as KU,” White said of the new look.

Departments throughout the university who design their own pages will be expected to adopt the new template for their pages. It will be available online after Jan. 17 and will feature information about the new template and step-by-step instructions for using it. The current template and instructions can be found at www.ku.edu/site/how.

Workshops will be offered for Web administrators throughout the spring schedule to help with the transition to the new template. The schedule of workshops will be announced in January.

White and Loats agreed the changes to the site might be visually dramatic, but that users should not be worried about the change.

“While it may be visually new and unfamiliar,” White said, “it will be easy to use.”
Calendar

Dec. 12 - Jan. 22

12 Monday
Academic date. Final exams continue.

13 Tuesday

14 Wednesday
Governess. University Support Staff Meeting. 10:30 a.m. Purcell Kansas Union. Free. Sponsored by Support Staff Senate. Call 844-4891.

• "Selecciones." Mexican art from the collection of Elizabeth Schultz, professor emerita of English, looks at one of the paintings she recently donated for "Selecciones: Mexican Art From the Collection." The show will be on display at the Spencer Museum of Art until Jan. 8 and features works from well-known Mexican artists such as Rafael Coronel, Rufino Tamayo, Leopoldo Méndez and Diego Riveras, among others.

Sharp named new director of research integrity

Bill Sharp assumed the role of KU’s new director of research integrity Nov. 22.

The position reports to Mary Lee Hummert and is responsible for managing and leading the research compliance team.

Sharp will also lead the development of policies, procedures and training materials related to research compliance and the responsible conduct of research.

Sharp has been part of what is now the KU Center for Research since 1998, when he joined the Office of Sponsored Programs as a grants specialist. He became a grants officer in 1997, a contracts officer in 1998 and a compliance specialist in 2000. In 2004, he made compliance manager and contracts officer.

and extend the life of oil fields, while also transferring successful technology to the state’s oil producers. Ku offers the only petrochemical engineering degree program in Kansas and based at the Ku School of Engineering, is charged with researching and developing processes specific to Kansas reservoirs that will enhance oil recovery from oil fields, while also transferring successful technology to the state’s oil producers.

University support staff employees who chose to work eight hours on Veterans Day accrued 12 hours of compensatory time that can be used during winter break, said Jeannette Johnson, assistant to the provost.

Those who wish to work during winter break, even though their offices are closed should contact Human Resources and Equal Opportunity to arrange an alternative work assignment. Administrative leave will not be given to those whose offices are closed during the break.

Select offices to close during break

Employees may make alternative arrangements.

A s students leave campus for winter break, a few Ku faculty and staff members will go with them, albeit for a shorter time. Provost and Executive Vice Chancellor David Shulenburger said university offices would close for varying amounts of time during winter break.

Shulenburger suggested employees check with their superiors to learn about the schedule of their offices. He also recommended calling the unclassified employees of offices are closed should contact Human Resources and Equal Opportunity to arrange an alternative work assignment. Administrative leave will not be given to those whose offices are closed during the break.

New undergraduate research programs introduced

The Office of the Vice President for Research has announced two new programs aimed at increasing undergraduate involvement in research. The Research Experience Program (REP) and the Undergraduate Research Assistantship (URA) Fund offer students and faculty the opportunity to enhance the undergraduate research experience. The offices of the provost and vice provost for research support the programs.

The Research Experience Program offers students the opportunity to gain research experience in their disciplines by combining coursework with experiential learning opportunities outside the classroom. The research experience will be noted on students' university transcripts.

The Undergraduate Research Assistantship (URA) Fund provides matching funds of up to $5,000 to encourage undergraduates to participate in faculty-led research and scholarship endeavors, to encourage faculty, when possible, to seek outside funding to support undergraduate research activities, and to heighten the importance of including undergraduate research as part of the overall KU education. The seed money is given to each student to cover expenses such as travel, supplies, or other research-related costs. The funds are matched by the provost and vice provost for research.

To learn more
For more information about REP, visit www.research.ku.edu/undergraduate-research-program.html
For information on the URA can be found at www.research.ku.edu/undergraduate-research-assistantship.html

Khamzat Zajgov, Tajikistan ambassador to the United States, visited KU on Nov. 16 and 17 to initiate discussions about establishing scholar and student exchanges between KU and Tajik universities. In addition to international programs administrators, the ambassador met with Provost and Executive Vice Chancellor David Shabenburger, Dean Ken Anus, and the Tajikistan ambassador.

The company plans to launch “The Aqueous Fund,” which will “provide institutional investors with the equivalent of a relatively high-yielding but extremely liquid hedge fund,” Brownstein said.

The National Science Foundation recently awarded John Kelly, associate professor of biology, $277,000 over three years for his proposal “A genetic experiment to determine the nature of epistasis in Mimulus guttatus.”

The project will study Mimulus guttatus, a wildflower, as how epistasis contributes to variation in floral morphology, development and male fitness components of the plant. The project will also provide genetic research opportunities for graduate and undergraduate students.

KU School of Business
Professor Dennis Karney

The University of Kansas School of Business is pleased to announce the award of the Redwood Faculty Fellowship in International Business for the current academic year. Karney, Ned N. Fleming distinguished teaching professor, will receive a stipend of $12,000, which can be used for teaching and research. The Redwood Fellowship was established in 1997 by the Dotson Johnson family to honor the accomplishments of Professor Emeritus of Business Anthony Redwood. It is meant to enhance the international capability and expertise of faculty in the KU School of Business by providing support for overseas study and travel. Redwood was a professor at the school for 27 years, retiring in 1998. He was the founding director of the Center for International Business.

“The school is dedicated to international experiences,” Dean William L. Fuerst said. “We encourage our faculty and stu- dents to gain business exposure abroad. This award is a way for us to give our faculty opportunities to study the economies of foreign countries and expand their international research.”

Karney is currently teaching at Ivan Franko Lviv National University in Ukraine under a Fulbright fellowship. The Redwood fellowship will allow him to study Ukraine’s transition to a market economy by visiting key regions and industrial and ship- ping centers.

_.

Finest faculty elected to faculty of national commissions

T he faculty members in KU’s School of Fine Arts were elected to two national commissions—members of national arts commissions. Larry Mallett, chair of the department, and Jennifer Rogers, associate chair, were elected to the National Association of Schools of Music (NASM) on Accreditation. Luise Greene, professor of design, was selected for the Commission on Accreditation for the National Schools of Arts and Design (NASAD).

“We are very excited about the election of Professor Mallett and Professor Greene to these positions,” said Steven Hadden, dean of the School of Fine Arts. “The election of our faculty members to these national arts commissions is a signal of the respect they have earned from fellow executives in the arts.”

Leland G. Alexander

Leland G. Alexander, 87, died Nov. 12. He was a University of Kansas ROTC instructor. Survivors include his wife, Bernice “Betti,” two daughters, five grandchildren, and seven great-grandchildren. The family suggests memorial gifts to Toys for Tots, and St. John’s Baptist Episcopal Church, 300 Oak St., Leavenworth, KS 66048.

Marjorie H. Richay

Marjorie H. Richay, 78, died Oct. 28. She was a professor of psychology during the 1950s. Survivors include a sister; The family suggests memorial gifts to the American Heart Association, 4643 Lindell Blvd., St. Louis, MO 63108, or to the Marjorie H. Richay Lecturers Fund in Social Psychology, care of Ann Beatty, 8112 Maryland Ave., Suite 300, St. Louis, MO 63105.

Megan Lloyd Schoeck

Megan Lloyd Schoeck, 69, died Nov. 18. She was a copy editor for the University Press of Kansas. Survivors include her husband, Richard; a stepson, two stepdaugh- ters; a sister; five grandchildren; a niece; a nephew; and a great niece. The family suggests memorials of the donor’s choice.

Donald S. Arick

Donald S. Arick, 78, died Nov. 25. He worked until his 1988 retire- ment in housing maintenance. Survivors include his wife, Ruth; Beer, a daughter; a sister; three great-grandchildren; and nine great-grandchildren. The family suggests memorial gifts to Burlington Community Library, Burlington Federated Church or Sabeta Church of the Brethren.

Evelyn Christine Goodrich

Evelyn Chirstine Goodrich, 79, died Nov. 30. She was a copy editor for The University Press of Kansas. Survivors include her husband, Dennis; a son; a grandson; a step-grand- daughter; and two caregivers. The family suggests memorial gifts to either the Leacock Educational Society or Lawrence Humane Society, sent to Ramsey-Yost Funeral Home.

Answer to Quiz

A Chancellor Deane W. Mallen was the first head of KU in 1862 in the Centennial Hall. His office was located at 1345 Louisiana St. Quiz Question is on page 2. www.buildings.ku.edu/shmt.

The University of Kansas

Leland G. Alexander
Chapin chosen for White House conference

Rosemary Chapin, professor of social welfare, has been chosen as a Kansas delegate for the 2005 White House Conference on Aging. The conference is held once every ten years and makes aging policy recommendations to the president and Congress, and works with the public and private sectors to promote dignity, health, independence and economic security for current and future generations of older people.

Cheung wins grant to teach in United Arab Emirates

Laurence Y. Cheung, professor and interim chair of general surgery at the KU Medical Center, has been awarded a Fulbright Scholar grant to lecture at the United Arab Emirates University, Al Ain, and work with medical students during the 2005-06 academic year. Cheung will lecture on “Evidence-based surgery in the United States” to students and the community.

Campus Q&A

Kuefner’s role: Bill Crowe was recently chosen as a candidate for president of the American Library Association. He is one of two candidates and the new president will be named early next year. The full interview is available at www.oread.ku.edu.

Joyce’s role: William “Bill” Crowe, Spencer librarian. Years at current job: I have been Spencer librarian since July 1999. (From August 1999 through June 1999, I was KU’s dean of Libraries.) For the last three of those years, i.e., from July 1996 through June 1999, I served also as vice chancellor for information services.

What’s the biggest challenge facing your departments right now? Seeking more effective ways to connect people with information that could be of use to them. What do you enjoy most about professional practice? I enjoy helping people navigate the sometimes very complex paths to find information they need. What issues do you deal with the most in the Libraries? I deal with the full range of issues that heads of most library units do: providing leadership for others, engaging our current and prospective users (on site and online) to understand their needs and wants; assessing the quality of our collection and services; and informing our campus as well as our community at large of our collections and services.

Education programs partner with Salvation Army to adopt families

The staff of the Educational Opportunity Programs (EOP), which includes all KU-based TRIO Programs, CAMP GEAR UP and the BluePrint Project, and the Office of University Relations, Workforce Development and Public Service (IERPS) have partnered with the Salvation Army to adopt families as part of community service. The program is important because it provides support for the entire family, unlike other services that are restricted to children under the age of 16. With the Adopt-A-Family program, all family members receive a gift to open and several clothing items, as well as provisions to make a holiday meal.
